

SEISMIC ISOLATOR

Adana City Hospital will ensure continuity of all operational activities even in the course of and after the greatest earthquake that may be experienced in relevant geography thanks to its triple friction pendulum type of seismic isolators.

Thus, healthcare services will be provided in uninterrupted and secure manner to tens of thousands people to be hosted everyday.

After completion of this great health campus, the structure will be granted with the title of “World’s greatest base isolated structure” with 1.512 isolators.

*Operating principle of triple friction pendulum seismic isolator
